Shure dates back to 1910 when Richard C. Richardson and a partner operated an architectural sheet metal workshop in St. Louis, Missouri. In 1920, Richard’s son, Joseph A. Richardson, joined his father as a sheet metal craftsman. He later became a registered professional engineer and industry leader.

In the early 1930’s, Joe joined Anheuser-Busch where he worked on the fabrication of metal ice cream cabinets and beer dispensing boxes. In 1938, Joe and a friend leased a Texaco service station. The business taught Joe how to best merchandise and sell tires, batteries, accessories and automotive service. The sideline business later formed the basis for the direction of Shure Manufacturing Corporation.

In December 1941, Joe joined with Samuel J. Shure in St. Louis to start a metal shop. As World War II began, the company focused on war related products such as airplane parts, fire extinguishers and stove cabinets.

After the war, Joe relied on his automotive experience and was asked to assist another St. Louis company in filling a contract for General Motors. Samuel and Joe were given an order to manufacture high-quality, enamel finished workbenches, cabinets, merchandise displays and desks for General Motors dealer service centers.

Eventually, Shure began to assist national accounts, such as Shell Oil Company, Texaco Inc., Conoco Inc., Firestone and Chrysler to supply retail sales and shops with productive and image related merchandising furniture fixtures and cabinetry. Shure supported and continues to support independent automotive and equipment distributors, as well as national account programs.

While Shure’s focus on the automotive industry has not changed, the industry has changed dramatically. Through the years, Shure’s product lines have developed and expanded into new markets, to include a full line of workbench systems, storage cabinets, tool storage cabinets, cart systems, fire service equipment and various shop equipment, as well as shelving and storage solutions.

As a third generation family owned and operated company, Shure’s personal touch continues to be the hallmark for customer interaction.

**Great Product And Great People... That’s The Shure Difference!**

**Hand Craftsmanship...**

**Custom Designed Engineered Solutions**
- Facility Layout & Customization
